

**FANUC**

**Setkání obchodních ředitelů Svazu strojírenské technologie 2020**

# **FIELD system FANUC's IoT**

October 22, 2020

Konrad Grohs, Director IoT Business, FANUC Europe Corporation

## CONTENTS OF PRESENTATION:

**1. Profile of FANUC, FANUC Europe and FANUC Czech**

**2. FANUC's product line-up**

**3. FANUC's IoT**

- ZDT (Zero Down Time)
- FIELD System

# Profile of FANUC

Headquarters: Oshino-mura,  
Yamanashi Prefecture, Japan

**Number of employees:** 8,164  
*(as of March 2020)*

**Sales:** 508 Billion JPY  
*(19.5% in Europe)*

**Ordinary Income:** 103 Billion JPY

**Net Income:** 73 Billion JPY

# FANUC Europe: Profile

- ✓ 100% Subsidiaries of FANUC Corporation
- ✓ 22 subsidiaries including Russia
- ✓ Covering Europe, Russia, North Africa and Israel
- ✓ Over 1,600 employees

# FANUC Czech Facility in Prague

Completion in April 2021

# FANUC Czech

## Number of employees:

- totally 55 employees
- 21 technicians for service
- 21 employees for sales and technical support
- 13 employees for finance, administration and marketing

## Main activities:

- CNC, Robot, Robomachine sales
- Spare parts stock
- Service
- Training
- Technical support

## Address:

K Bílému Vrchu  
Praha 9 – Horní Počernice\*

\*since 4/2021

# FANUC Academy

**Capacity – 5 rooms, up to 14 people in each room (max. 2 people per machine)**

**Additional devices (Vision, conveyor, positioners...)**

**FANUC CNC simulators**

**ROBOTS for training**

**ROBODRILL, ROBOSHOT for training**

# Service activities

- Service repairs
- Preventive maintenance
- Technical support
- Remote diagnostic
- 24/7 Hotline

# FANUC Core Technology

and Global Install Base

# FANUC Factories

highly automated and robotized

Servo motor assembly

CNC assembly

Robot assembly

Machining

Cabinet assembly

**Zero Down Time (ZDT)**

# ZDT (Zero Down Time): Concept

- To eliminate unexpected downtime, the preventive and diagnosis function provides trouble diagnosis information and maintenance notification.
- ZDT consists of 4 components

## Mechanical Health

Reducer failure prediction  
Motor torque monitor

## Process Health

Spot welding diagnostics  
Arc welding diagnostics

## Maintenance Health

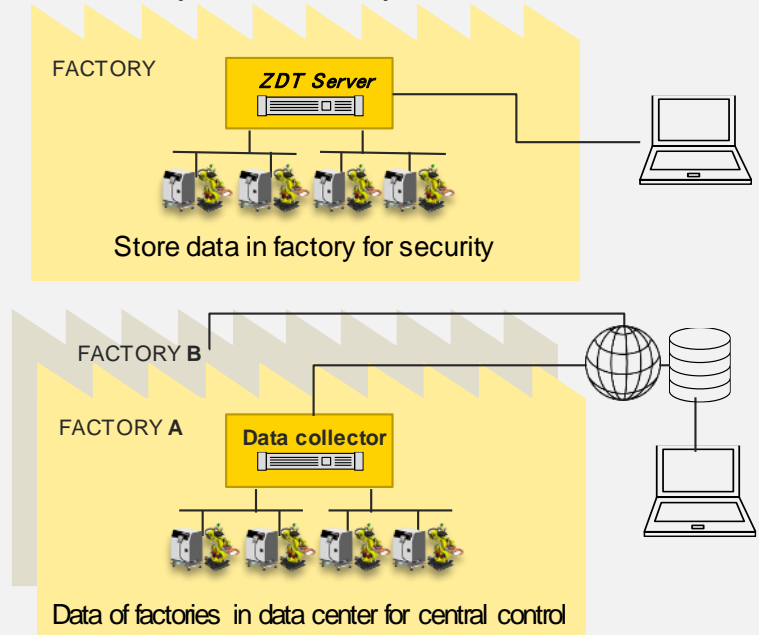

Maintenance reminder

## System Health

Memory usage  
Alarm information

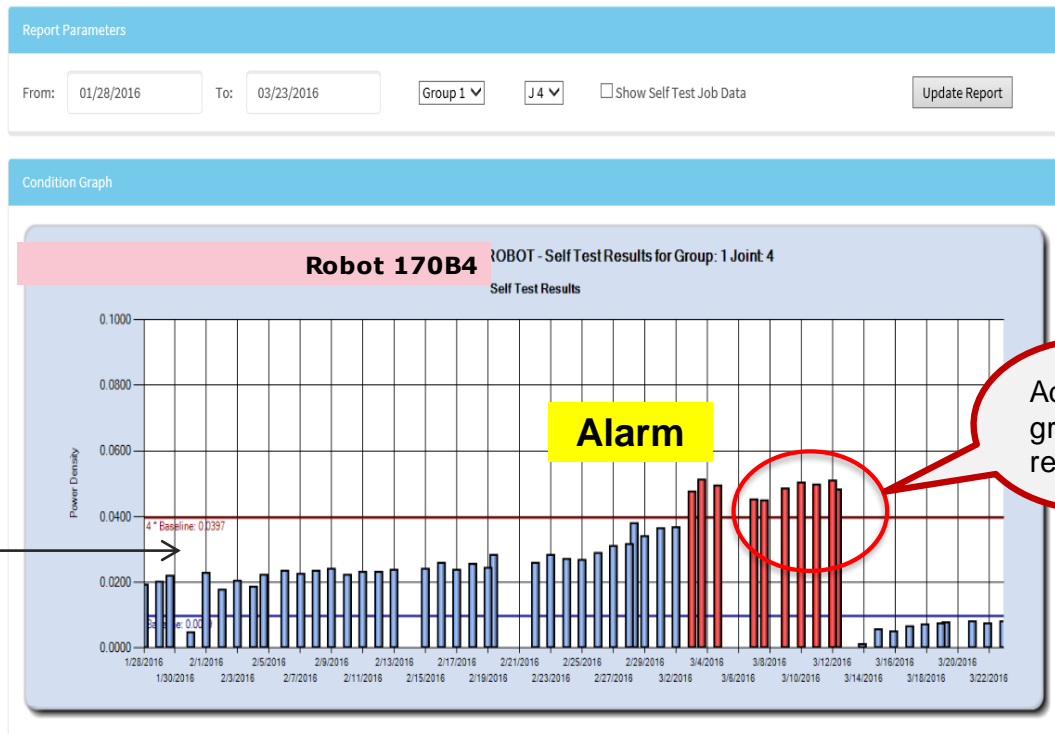

- Collecting/analyze data with IoT technology for efficient “predictable” preventive maintenance.

# ZDT : Prediction of Reducer Failure

- Customer forgot to grease after replacing reducer
- Prediction of the reducer failure prevented unexpected down time

Maintenance

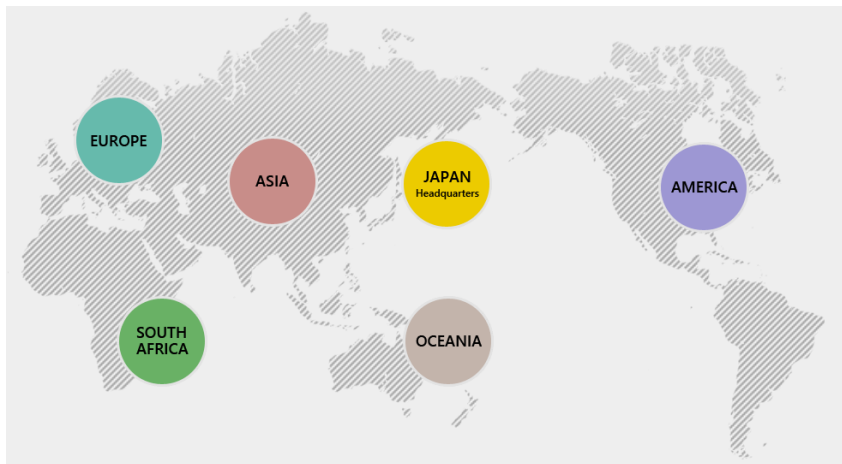

# ZDT : Global Installed Base and Results

## Connections

Connect about **20,000 robots**

## Results

Analytics by service department prevent down time of **over 1000 cases**

	Detected Items
Mechanical Health	Reducer and motor torque failure, too many servo off
Process Health	Servo gun torque failure, paint analytics failure
System Health	Battery low

# **FIELD system**

Open Industrial IoT platform on-premise

**CONNECT**  
Connect various devices  
across manufacturers  
and generations

**Smart Machine  
Smart Factory**  
Drive the machines at site  
smartly and efficiently to  
create a smarter factory

**DRIVE**  
Control and drive  
edge equipment  
close to real time

**MONITOR**  
Integrated data visualization,  
analysis and improvement

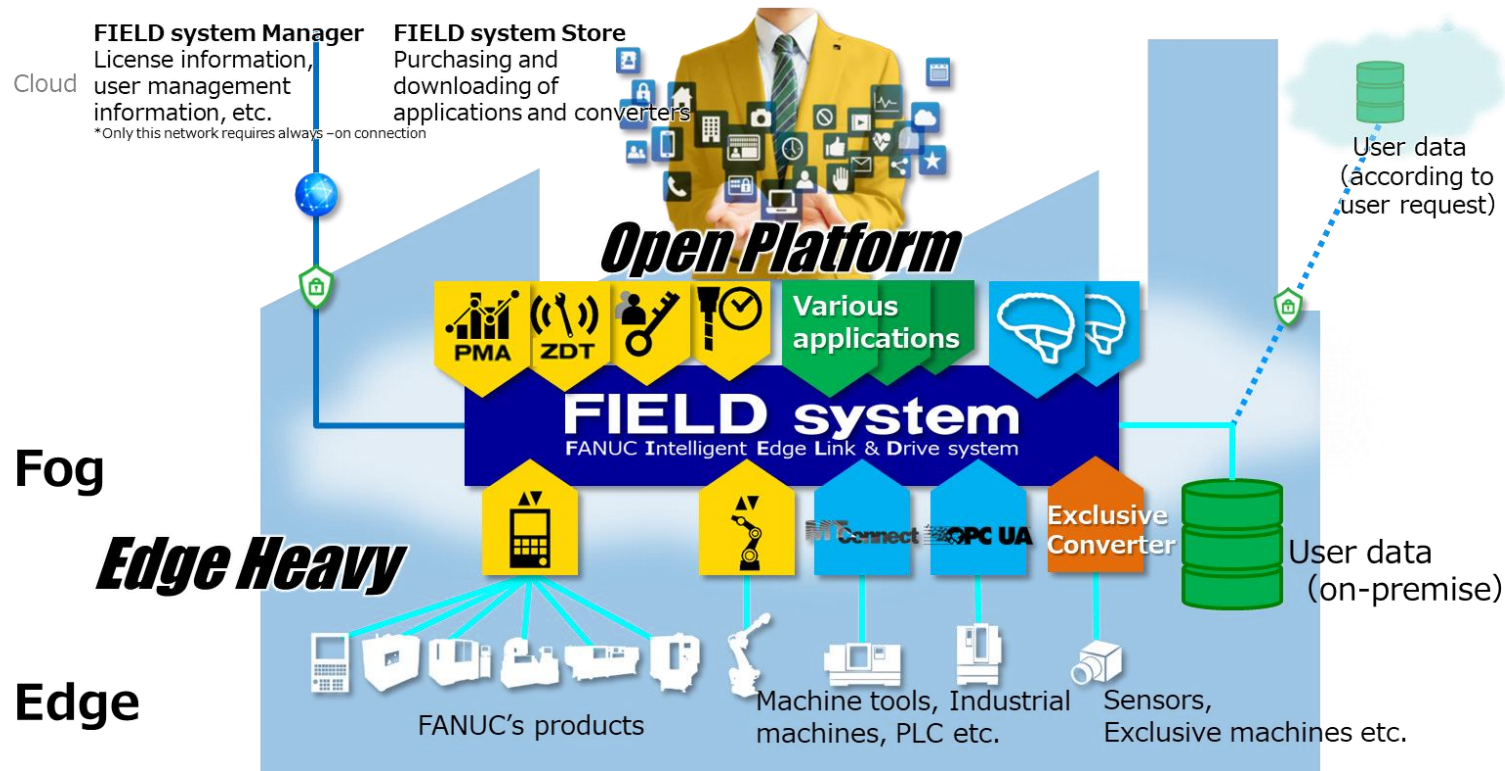

**Edge Heavy**  
Most data are processed in Fog;  
user-data are stored on-premise

**Open Platform**  
Develop and sell applications  
and converters freely

**THINK**  
Think with AI to realize  
smart automation and  
optimization

# FIELD System : Conceptual Diagram of Connection

# Why FANUC FIELD system?

Improve machines uptime

Reduce energy consumption

Reduce cost of consumables

Improve process quality

Increase Overall Equipment Efficiency (OEE)

# FANUC's FIELD system = reliable Industry 4.0 platform

End Customer

MTB (or MTB Dealer) or **Total Integrator**

Cyber-secure installation of FIELD system  
by knowledgeable and experienced European **Network Integrators**

System Integrator

Non-FIELD  
system  
Hardware  
(sensors,  
devices,  
machines)

Attractive  
**FANUC Apps**,

Attractive and checked  
**3<sup>rd</sup> Party Apps**,  
by **approved** and **innovative 3<sup>rd</sup>  
Party Software **Application  
Developers**.**

**FIELD system**  
Reliable Industry 4.0 Platform

# ARTIS C-DASHBOARD

- Extend cutting tool life by machining condition monitoring
- Detect cutting tool breakage
- Monitor process health
- Minimise machining quality issues
- Minimise machine downtime by condition monitoring
- Lower production cost per part
- Detect harsh machine usage or collisions

# MARPOSS

Many process monitoring strategies

# Defect Inspection

- FIELD system supports AI algorithms.
- Such algorithms can be successfully applied in vision systems. **V7 Defect Inspection** delivers:
  - Fast quality inspection
  - Improved quality analysis
  - Enables inspection in areas previously impossible
  - Savings from reduced quality recalls

Vision supported by AI  
for quality check
